## Marketing concentration and geographical dispersion: A survey of organic farms in England and Wales

This measure fails to capture the volume of traffic across main lines and branches, but until further research is completed it will have to suffice.

## City dwellers idealise Britain's countryside, but there's no escaping rural poverty

The extent to which rural communities in Victorian England and Wales were able to adjust to changing economic pressures depended in part on the degree of their integration in the rail transport network. In a recent presentation on the Sardinian cadastre of 1730, André Palluel-Guillard encouraged historians and historical geographers to apply the methods of Geographic Information Systems système informatique géographique to study the oldest land survey of its kind in Europe. A surge of rail construction in the 1840s ended in the 1850s as many companies went bankrupt and feverish investment all but stopped.

## City dwellers idealise Britain's countryside, but there's no escaping rural poverty

Vehicle integrators can convert existing diesel or battery electric vehicles into hydrogen dual fuel or fuel cell range- extender vehicles, respectively.

## Hydrogen in Wales: A Pathway and Next Steps for Developing the Hydrogen Energy Sector in Wales

Rural housing has its own. The iron rail proved a magicians' road.

## RURAL POWERHOUSE

It is made up of major regional centres and coastal cities, small towns and remote communities.

## Wales Rural Network

The shift to England and Wales permits a shift in methods and scale, for GIS SIG methods make it is possible to explore patterns of change that affected not one or several but thousands of rural communities in the age of the railway. After decades of increasing depopulation, the degree of stability reached in central and northern Wales stands out as rather remarkable. FACE has been supporting forestry and other rural businesses to

successfully access LEADER, CPS and other government funding for a number of years.

## **ACRE**

Strategic aim 3: Strengthen the self-sufficiency of the local economy and support active, resilient, and connected communities This can be achieved with more local food that is sustainably produced; with shorter and circular supply chains between consumers, producers, and suppliers; by increasing resource efficiency - reducing, reusing, reimagining and recycling waste; and by growing the green economy through community initiatives and skills development.
