Submarine facilities were constructed on
Ordnance Island, at the eastern end of the
Bermuda group, in St.

**Building the Navy's Bases, vol. 2 (part
III)**

Filesize: 40.94 MB

On February 1, 1944, the station was reduced in status to an auxiliary air facility and to caretaker status a year later. When the cease-operations order was issued, 7,000 feet of the breakwater had been completed, and everything was in readiness for major construction involving the quarrying and placing of 20-ton rock. The small amount of construction materials required was an advantage, as shipping was then at a decided premium.

Internet Archaeol. 19. Geddes. Bibliography

Leased in its entirety, the island had approximately 150 acres of firm ground surrounded by 150 acres of salt flats and mangrove swamps. Both the earlier work and the later additions required a considerable amount of clearing, excavating, and road building. By informal agreement, the Navy had previously financed improvements made by Avianca to the field, including asphaltting the 4,500- by 400-foot turf runway and building a brick control tower.

TAN 5 Hebridean Blackhouse

Navy's first operations were directed toward the protection of the Lake Maracaibo tanker lanes, along which crude oil was supplied to the Curacao refineries. Jungle was cleared and a portable mooring mast, helium-storage building, and a small radio station were erected.
