

Policy problems and policy perceptions in the National Health Service.

[Macmillan] - Community perceptions of health insurance and their preferred design features: implications for the design of universal health coverage reforms in Kenya

Factor Contributing to Scientific Integrity Perceptions	Relevant Survey Questions
Competent and trustworthy leadership	1. In your opinion, what are the greatest barriers to science-based decisions at your agency? (Choose up to 3.) Absence of leadership with needed scientific expertise Influence of political appointees in your agency or department?
	2. The level of consideration of political interests hinders the ability of my agency to make science-based decisions. (Agree/Disagree scale)
	3. The level of consideration of business interests hinders the ability of my agency to make science-based decisions. (Agree/Disagree scale)
Finding effective and valued	4. Over the past year, I have noticed that resource allocations (e.g., funding, staff time) have been distributed away from programs and offices whose work is viewed as politically contentious. (Agree/Disagree scale)
	5. In the past year, I have been excluded from discussions or decisions related to my scientific work that I normally would expect to be a part of. (Agree/Disagree scale)
	6. I have avoided working on climate change or using the phrase "climate change" enough I was not explicitly told to avoid them. (Agree/Disagree scale)
	7. Compared to one year ago, the effectiveness of your division or office has: (Decreased/Stayed the Same/Increased)
	8. The presence of top agency decision makers who come from regulated industry inappropriately influences the decisions made by the agency. (Agree/Disagree scale)
	9. Currently, I can openly express any concerns about the mission-driven work of my agency without fear of retaliation. (Agree/Disagree scale)
Clear, comprehensive scientific integrity policy	10. My agency adheres to its scientific integrity policy. (Agree/Disagree scale)

* on question 1 survey respondents were given 14 options; however, for the purposes of assessing perceptions of scientific integrity, only the two options listed below were included in this analysis.
