2 Geography and Critical Issues

Abrupt increase in Greenland snow accumulation at the end of the Younger Dryas event.

China's Environmental Challenge: Political, Social and Economic Implications

These global warming facts will walk you through the fundamentals and projected effects of global warming if it remains unchecked. Respected scientists announced correlations that they insisted were reliable enough to make predictions. NADW diminished greatly during the last glaciation and was relatively strong during the interglacials.

Kyoto Protocol

One primary goal of this journal is to contribute to real-time policy analysis and development as national and international policies and agreements are discussed and promulgated. This lobby group included interests from the coal, electricity, aluminum aluminium, petroleum, minerals and cement industries.

Climate Change Indicators: Glaciers

The degree of smoothing has been set such that an attenuation of 50 percent occurs for CO₂ variations of 20 years' duration. Causal mechanisms for glacial-age climate fluctuations appear to be complex, and phasing of these events is not understood from region to region.
