The visual monitoring task requires you to keep an eye on a gauge to determine when said gauge needs to be reset. You have filled the squares for the administrative stuff.

An automated version of the operation span task

UPT is more of a mind game.

AFOQT Practice Tests

An endogenous distributed model of ordering in serial recall. I just got my job of choice today of Military Intelligence Analyst, and I am now on the road to my future career in the CIA or NSA.
