Pediatric Nursing (NURSETEST) by Mary Anne Blum Condon

Greeley, CO: National Board of Chiropractic Examiners, 2005. Longer scenarios that more closely represent the nature of clinical practice could provide an opportunity for students to learn how to anticipate and respond accordingly. The study findings by Hawk and colleagues found that one of the variables for likely presenting with nonmusculoskeletal complaints was age less than 14 years.

Pediatric Nursing by Mary Anne Blum Condon

These simulation standards highlight the importance of having a standardized approach to the design and implementation of simulation across the entire spectrum of use.
