The EU, in particular, emphasises the role of users as data content generators and value creators in the digital economy. Avoid unnecessary increases in compliance costs.

Is Resource Nationalism Making A Comeback To México with López Obrador?

Fixed broadband penetration in Myanmar remains extremely low mainly due to a limited number of fixed lines as well as the dominance of the mobile platform and an unwillingness by operators to invest in fixed broadband infrastructure. As such, it undermines private property rights and interferes with the efficient and voluntary market interaction of producers, investors, and consumers.

Building Telecom Markets

Telecom services now cover over 90% of the population, though penetration rates. Consider what might occur if the warped logic of forced access and mandatory resale was applied to automobile manufacturing or the fast-food business. On the other hand, it could decline and slow down as the market matures.

Taxing the Digital Economy: Time for Pragmatism

The answer lies in the legal incentives as well as disincentives governing the telecommunications market.

Telecommunications Reform : How to Succeed

Despite this, Brazil only ranks 7th in the world for installed wind power capacity and 22nd for solar, revealing the underlying complexity holding back the hydroelectric-dominated market.

Telecommunications in the Philippines

Content provided by Oxford Business Group. The mobile average revenue per user ARPU levels have been decreasing in the Philippines due to the visible competition in the mobile industry. This article reviews and comments on the paper, which marks a major shift in World Bank thinking

Anshu Prakash: Government working on spectrum reform measures: Telecom Secretary, Telecom News, ET Telecom

The adoption of conventional free markets or other principles should be tempered by the consideration of pragmatic and well-thought-out mechanisms that provide domestic firms a reasonably level playing field.
