Pathways to Sustainability

There are many technical hurdles as well as economic and environmental barriers that must be overcome before we will see a 100% replacement of fossil fuels — there is little hope that renewables can replace fossil fuels, or nuclear energy, any time soon. Such appliances often cost more than others, but the savings in energy costs often make it cheaper in the long run. His 12-year-old son was in tears at the breakfast table, asking what could be done — and my friend wanted to know what to say to him.

Renewable energy is not enough: it needs to be sustainable

Currently, uranium — nuclear power reactors use only 1% of the potential energy available in Uranium, and the rest remains as radioactive waste.

Elliott D. Energy Society and Environment: Technology for a sustainable future [PDF]

In this solution-based approach, I had to be careful to avoid a Pollyanna offering. Forests can still be kept standing, but agricultural and food crops cannot.
