Agriculture Finance

Role of Agriculture in Economic Development : The agriculture sector is the backbone of an economy which provides the basic ingredients to mankind and now raw material for industrialisation. Source of Foreign Exchange for the Country: Most of the developing countries of the world are exporters of primary products. In India, still 28% of national income comes from this sector.

Role of Agriculture in the Economic Development of a Country

Singapore: World Scientific Publishing, 1992.

The Economic Impact of World War II

The evidence available fails to support a proposition that credit will be redistributed towards small farmers under the Islamic system.

Impact of Village Savings and Loan Associations: Evidence from a cluster randomized trial

It is published as part of our mission to showcase peer-leading papers written by students during their studies. These have outlived the gaining of independence on behalf of these countries, and their control has largely been taken over by local elites.

Agriculture Finance

Shift of Manpower: Initially, agriculture absorbs a large quantity of labour force.

The Importance of Institutions to Economic Development

Raising supply of food by agricultural sector has, therefore, great importance for economic growth of a country.
