

Crystalline enzymes

Columbia U.P - CAB Direct

Historical events

- Invertase immobilized on activated charcoal (Nelson & Griffin, 1916).
- Enzyme immobilization by covalent bonding on diazonium derivative (Grubhofer & Schleith, 1953).
- Encapsulation of enzymes in semi-permeable spherical membranes (Chang, *et al.*, 1964).
- Cross-linking of crystalline enzymes (Quiocho & Richards, 1964).

Crystalline Enzymes

As methamphetamine is associated with a high potential for misuse, the drug is regulated under the and is in the United States. In the United States, dextromethamphetamine hydrochloride, under the trade name Desoxyn, has been approved by the FDA for treating and in both adults and children; however, the FDA also indicates that the limited therapeutic usefulness of methamphetamine should be weighed against the inherent risks associated with its use. It has a melting point between 170 and 175 °C 338 and 347 °F and, at room temperature, occurs as white crystals or a white powder.

Crystal structure and mechanism of a bacterial fluorinating enzyme

Chiral separation is needed to assess the possible contribution of , which is an active ingredients in some OTC nasal decongestants, toward a positive test result.

Crystallin

How good is fluorine as a hydrogen bond acceptor? Brighton, UK: Healthline Media UK Ltd. International Union of Basic and Clinical Pharmacology. Importantly, these kinetic parameters are determined under conditions which obviate artifacts due to diffusion limitation of substrates or products.

Crystal structure and mechanism of a bacterial fluorinating enzyme

Sufficiently overexpressing ΔJunD in the nucleus accumbens with can completely block many of the neural and behavioral alterations seen in chronic drug use i. Neurotoxic and neuroimmunological This diagram depicts the that mediate methamphetamine-induced neurodegeneration in the human brain. In low to moderate doses, methamphetamine can , increase alertness, concentration and energy in fatigued individuals, reduce appetite, and promote weight loss.
