Deregulation and innovation: evidence from the electricity industry

Yet, grid expansion in several regions has been nil Lynne Kiesling I declare our conference on the experience of electricity restructuring in Texas on Friday at AEI a success! International Journal of Industrial Organization, 20, 653—671. These failures are abetted by the structure of the regulatory process: regulation operates outside our usual system of checks and balances, where policies are enacted directly by our elected representatives and disciplined by taxing and budgeting.

Electricity (de)regulation and innovation

There is nothing geostrategic about it.

Deregulation and innovation: evidence from the electricity industry

With a better regulatory system, we can enjoy a healthy environment, safe workplaces, more innovative products, and greater opportunities and prosperity for all Americans. Legal and economic aspects of ownership unbundling in the EU.

Deregulation and innovation: evidence from the electricity industry

Catering to the whims of the regulators can dominate other considerations. The aim was to progressively compare countries that have gone through major reforms with those whose electricity market remains essentially regulated, to identify and separate the direct effects of the reform on innovation from any type of pre-existing trend.

January 2008

Sensible, evidence-based regulations that respect the fundamental role of free-market competition can provide vital public benefits — such as protecting the environment, public health and safety, civil rights, consumers, and investors. Also, the empirical evidence about the relationship between innovation and deregulation is rather mixed. One can also see why it was not possible to carry out the operation in one go: it is not surprising that other texts were gradually added to the first directive.

About Lynne Kiesling

For example, a clean and healthy environment, safe food and drugs, and fair business and employment practices are among the most important things citizens expect of their government. These results are followed by a discussion on why this scenario occurs. *Zeitschrift für Energiewirtschaft*, 3, 33—42.
