## Surface pressure model for simple delta wings at high angles of attack

Figure 10 shows the heat transfer results for pair of vortex generators with the common flow up. The CFD code RANS3D, solving the Reynolds Averaged Navier Stokes RANS equations in curvilinear boundary- fitted coordinates for conservation of mass, moment and other scalars in three dimensional turbulent incompressible flows, has already been developed and extensively validated at NAL Bangalore.

## Characteristics of fin buffeting over delta wings

Wings for flight is useful as a pre-test or post-test for summative assessment.

## Delta Wing

Mary, in , 2002 4.

## Surface pressure model for simple delta wings at high angles of attack

Certification : All listed Moyes gliders are HGMA certified.
