Conformal Coatings

As curing proceeds, the average molecular weight of the coating material increases until a solid polymer layer is formed. ENESEAL MP is a single component, water-based, ultra-low viscosity weather barrier which dries to a completely invisible, water repellant masonry sealer.

Conformal Coatings

These stresses can cause component malfunctions or coating delamination from the circuit board, rendering them ineffective.

Conformal Coatings

This puts our country in an excellent position to acquire a permanent leading role in the field of development, production and application of coatings. Surface Coating and Modification of Metallic Biomaterials.
