Rays of hope

Investors, though, still have cause to hesitate. The OECD now accounts for just over half of global oil consumption, the smallest share on record.

World Energy Outlook 2020

The NOCs suffer from similar weaknesses, aggravated in many cases by their governments creaming profits for other uses. Renewable energy is only one part of cleaning up our environment. I have met with leaders from Arab nation governments, including Iraq, that were very keen on cooperating with Israel on cleantech and water tech.

Rays of hope

The events of the last few weeks are a watershed for Tunisia, Egypt, and other countries.

Solar Energy for Desalination in the Arab World

The complex can power a city twice the size of Marrakesh. Similarly, we are working on maritime transport in the region, and marine highways in the Mediterranean.
