Planirovanie i khozraschet v proektnykh organizatsiyakh (1947 edition)

Copyright information Cite this chapter as: Malle S. The basis of the method is reservation; its volume is established based on statistical information on work performance in projects, taking into account the changes in project output made for a number of reasons.

CAB Direct

Conclusions: the article summarizes the results of the study and determines that in the future a promising task is the approbation of the proposed approaches, as well as the development of a cognitive approach to cost management of innovative projects. In the matrix of final destinations by branches only 80 large customers for each type of equipment were singled out and their demand per unit of output was estimated, see N. Nouvelles de Moscou, 1989, no.

Labour

To achieve the goal, the following tasks are solved: analysis of processes for determining the cost of an innovative project, a review of methods for assessing the value of an innovative project and highlighting their disadvantages and advantages, developing an algorithm for selecting a method for assessing project costs, creating a cost management model for an innovative project.

Conclusions The proposed method enables to move to a qualitatively new level of communication between contractors and customers.

Ingibitory Dlya Sistem Oborotnogo Vodosnabzheniya by Driker Boris, Tarasova Svetlana, Tarantaev Aleksandr

Among the methods proposed in the literature, it is taken into account: parametric evaluation, evaluation of real options, a bottom-up and top-down rating, and a method of comparable ratings by analogs. The notion re-emerged during the and was later greatly emphasized in the late 1980s during when it also implied.
