The Limits of Alliance: The United States, Nato, and the Eu in North and Central Europe by Andrew A. Michta

It has already become clear that PESCO will not alleviate gaps in crucial high-end military capabilities in Europe—and may

instead become a venue for individual nations to secure supplementary EU funding for pet projects, while the EU leverages PESCO in support of more overt and dangerous political goals. More specifically the amount spent by each American citizen on the defence of Europe was greater than that of the average citizen of Europe.

The US, the EU and NATO

.

NATO expansion and the political crisis in Europe

The Europeans bore the geographical risk.

Member states of NATO

Allies also established NATO force integration units NFIU, small teams staffed to support defense planning and facilitate rapid reinforcement, and deployed them to the Baltic States, Poland, Romania, and Bulgaria. Artificial intelligence is already revolutionizing military logistics and recruitment and is on its way to being applied to military equipment and weapons.

Permanent deterrence: Enhancements to the US military presence in North Central Europe

NATO should focus first and foremost on this threat. Its forces are larger than European forces, but much of that force is devoted to the logistics of power projection. A land-based fires capability would speak to the potential for a greater U.
