Chapter 51 WATER AND WASTEWATER RULES AND RATES

These may include pathogenic viruses and

bacteria, parasites, toxic chemicals and radioactive isotopes. Except as otherwise provided herein, the Director shall administer, implement, and enforce the provisions of this subchapter.

Browse authors: Azikiwe, Nnamdi, 1904

However, if a chronically delinquent customer can demonstrate to the utility that he does not have adequate financial resources to pay the outstanding bill without participation in the settlement agreement, or because he has a low income and is elderly, disabled or subject to other special considerations, the utility shall give special consideration to such a customer in determining whether to extend a settlement agreement to that customer. Septic tanks shall be constructed of sound, durable, watertight materials that are not subject to excessive corrosion, frost damage, or decay.
