## The Management of Coastal Landscapes

There is geological and geomorphological information on most the cliff exposures of the Jurassic Coast, World Heritage Site, Dorset and East Devon, southern England and other parts of Devon, of Hampshire and the Isle of Wight. They can include exceptional examples of outstanding natural habitats, or superlative natural features.

## Geology of the Central South Coast of England

The extraction of the remaining reserves beneath the lake will be undertaken using a dredger.

## Geology of the Central South Coast of England

International and National Nature Conservation Designation. The Building Stones and the Purbeck Marble, a gastropod limestone have long been quarried.

## DeepDyve

The Wealden is excellently exposed in beautifully coloured cliffs of marls, clays and sandstones with lignite. Use is very heavy, and they comprise one of the most visited geological websites in the world. The 1965 survey highlighted the aesthetic threat caused by uncontrolled development of shacks and caravans, illustrated in the photograph opposite.

## Have your say

Major industry was expanding on an unprecedented scale and caravan sites which gave holidaymakers more affordable places to stay, also sometimes spoil the very coastlines their occupants were travelling to admire.

## **DeepDyve**

Study of effects of proposed dredging. Durham Coast Once a popular holiday destination, the Durham coast became an industrial dumping ground in the 1960s for waste created by the deep coal mining taking place under the North Sea.

### **The UK heritage coasts: An assessment of the ecological impacts of tourism**

The paper presents a summary of an investigation into the nature of ecological impacts within defined Heritage Coasts in England and Wales. Belle Tout : outer enclosure looking east towards the lighthouse and showing rabbit damage. However, on 12 March 1965, Whiteford Burrows became the first piece of land to be safeguarded by the Neptune Coastline Campaign.
