Tractatus de Corde, Item De Motu & Colore Sanguinis, & Chyli in com Transitu. by Richardo Lower MD [Richard Lower]

Oxon de febribus Vindicatio adversus Edmundum De Meare. .

LOWER, Richard (1631

Tractatus de corde reports his observations on the scroll-like structure of the cardiac muscle, the velocity of blood flow and its quantity, as well as the effects of aeration on the blood as it passes through the lungs.

heart

The man after this operation, as well as in it, found himself very well, and hath given in his own narrative under his own hand, enlarging more upon the benefit he thinks he hath received than we think fit to own as yet. This second experiment was not recorded in the Transactions of the Royal Society.
