Bird Checklist for Grand Teton National Park

Violet-green, tree, cliff and barn swallows scoop insects out of the air as western wood-pewees, dusky flycatchers and mountain bluebirds hawk for flying insects.

Jackson Hole Wyoming

This guide will acquaint you with some habitat types of the park and parkway as well as specific locations to look for birds. Birds The US Geological Survey's Northern Prairie Wildlife Research Center lists more than 300 bird species for the national park and its surroundings.

Adventure Journal: Birding in Grand Teton National Park

Many of the aspen stands in the park and parkway have rotting trunks that attract numerous woodpeckers. Blue grouse and ruffed grouse nest here.

NostalgicOutdoors™

Alpine Above 10,000 feet, severe conditions limit vegetation to low-growing forms. An occasional green- tailed towhee flutters through the sage-brush near the overlook and evening grosbeaks visit from the forest. Phelps Lake Overlook The trail to the overlook traverses a lateral Migratory Bird Conservation Program Most of the birds found in the park and parkway are migratory, spending only 3-6 months here each year.

Jackson Hole Mountain Guides

The great blue heron, for example, a large wading bird that skewers fish and other aquatic prey, might be encountered along the Snake River at any time of year, although more commonly from spring to fall. A Guide to Exploring Grand Teton National Park RNM Press was written by Ranger naturalist s Olson and Bywater.
