21st Century

This caused WW1 because they wanted to free their country. It is also important to note that there are significant variations between and among populations and across regions. In 2017, about 54 per cent of the Canadian population aged 65 and older was women, increasing to nearly 65 per cent for those aged 85 and older, and to 89 per cent for centenarians.

Demographic Development In The 20th Century

I know that in my own experience, having five children can be quite expensive and it means that we have to very seriously watch our and manage our finances just in order to provide for the family. Results show that the growth rate of the native populations is much higher than the rate of the total Canadian population.

Demography in Canada in the Twentieth Century, Wargon

The quest for stable money and the appropriate institutions to support it was an important part of twentieth-century economic history and is likely to continue into the twenty-first century.

1.2 Historical Demography of Canada, 1608

Between 1901 and 1911, there occurred significant growth of nearly 3 per cent per year as a result of heavy immigration, much of it directed to the Western provinces and the Northwest Territories. It is a nice thought to think that our children will be there to look after us just as we looked after them when they were young.

Demographic Development In The 20th Century

However, the older generation has over the past experienced a fluctuating death rate which retained the general decreasing tendency with a smoothly decreasing projection. Meticulously researched, using an exhaustive range of previously unused source materials, it provides a detailed examination of the many ways in which migration shaped twentieth-century Irish society.
