## Clearwing Moths (Lepidoptera: Sesiidae)

There are ten genera and 22 named species in North America; BC reports three genera and four species -- Hübner attacks apple and other rosaceous trees; L. Pagbubuod: Ang biyolohiya sa kamuraang gulang ng Zethera musides Semper na inalagaan sa laboratoryo ay bahagyang ipinakita sa pamamagitan ng initlog ng isang babaeng ispesimen na inobserbahan sa probinsiya ng Negros, Republika ng Pilipinas. Hind tibia with erect and elongate scales on upper surface; adults moving with characteristic scuttling run.

## Butterflies and moths in the Sesiidae, Oecophoridae, and Lycaenidae Families

Gorburonov 1992 : Revision of the types of the Sesiidae Lepidoptera , preserved in the collection of the Zoological Museum of Kiev State University.

## Research Articles

Holcocera immaculella McDunnough attacks the cones and seeds of pines. Key words: biology, Catonephele, Ectima, egg, Eunica, Euphorbiaceae, Hamadryas, Heliconius, hostplant, immature stages, larva, morphology, Myscelia, Neotropical, pupa, South America, Venezuela. Al comparar el numero total de especies presentes por mes contra el diagrama ombrotermico, se encontro relacion entre la epoca humeda y alta riqueza especifica y entre la epoca seca y baja riqueza.

## Butterflies and moths in the Sesiidae, Oecophoridae, and Lycaenidae Families

Dorow 1990 : Neue Funde von Paranthrene tabaniformis ROTTEMBURG, 1775 Lepidoptera: Sesiidae. Certain genera and even subfamilies of longhorned beetles associate with or even require living hosts for larval development, and others associate with dead hosts 65. Révision des Aegeriidae de Barbarie.

## Lepidoptera

Sesiidae: Bilan d'une saison de chasse aux phéromones Lepidoptera. How To Pronounce Mesolia oraculella How To Pronounce Mesolia pandavella How To Pronounce Mesolia pelopa How To Pronounce Mesolia plurimellus. Tropical Lepidoptera 2 1 : 43-51.

**Erich Bauer, Antiquariat Goecke & Evers**

The nymphs and adults have plaguelike aggregations when they feed. There are 10 species in 10 genera in BC. The bodies are striped lengthwise in alternating whitish green and darker green lines, with several dorsal maroon blotches.

**lepidopteran**

Cockerell 1888 : *Sesia myopaeformis* in the Isle of Thanet.
