Migration of hydrocarbons in sedimentary basins (1987 edition)

Cited by: The main intention of this book is to provide geoscientists interested or working in hydrocarbon exploration with a comprehensive understanding of the evolution of hydrocarbon migration systems in sedimentary basins and to give guidelines for its application in basin evaluation. Chapter 2 documents the existing deep source in the Barents Sea and northern Timan-Pechora Basin. This book is a useful primer for geophysicists, geologists, and petroleum engineers in the oil industry who wish to expand their knowledge beyond their specialized area.
