Our flat universe

The Planck Collaboration itself did a lot of analysis and checking, and came to the conclusion that our universe is really flat, but that some other contaminant is nudging the data to make it look curved. It was like the memory was implanted into my brain overnight and I woke up with it. Mathematicians, scientists, philosophers and curious minds alike have guessed at the shape of our universe.

Our flat universe

For almost a hundred years science has been haunted by a dark secret: that there might be mysterious hidden worlds beyond our human senses. Perhaps such dreams are glimpses from what one experienced in a parallel Universe. Whether you are at the beginning, middle, or the end of the line, it's all there at once.

Straight Lines in a Curvy Universe

I asked around what happened to the building because I was just there yesterday and people said there had never been a building there and they were planning construction on a building now in that same spot.

In a parallel universe: James Bond theme songs that didn't make the cut

Current theories of the universe, which describe its age, size, and how it evolves over time, are built around a flat spacetime. Both cases, says physicist Brian Greene, are possibilities, but if the latter is true, so is another posit: There are only so many ways matter can arrange itself within that infinite universe. There are also other forces driving all the destruction and chaos, forces that are both extra-terrestrial and dimensional.

He was never seen again. Over the years scientists have learned a lot about dreams, but there are still many things that remain unknown.

Straight Lines in a Curvy Universe

You read every doctor book. So what's really going on with these anomalous detections in Antarctica? You watched every doctor show.

Are Some Of Our Dreams Glimpses From A Parallel Universe?

Is it possible that the Bible may have been speaking about portals or gateways into the heavens or hell s in various places throughout the Bible? This never happened to anyone on earth.

The Universe May Be Round

It was me and my ex; we were walking down a street in the city, like a neighborhood in the city, the streetlights were out, so it was really dark, I was to the right of him, him to the left, and we were just walking down this sidewalk in the city, not speaking or anything, just walking.
