Haematology ST3 Interview Format: How to Prepare and What to Expect

Mohammed Z, Novitzky N, McDonald A. Thromb Haemost 2010;104 6 :1228-1234.

Clinical Haematology

There are three stations, all lasting 10 minutes with a 3-5 minute transfer time between stations, so approximately 40-45 minutes in total. Immunosuppressed HIV patients are predisposed to parvovirus B19 infection, which should be suspected in all cases of isolated severe anaemia, usually with preserved platelet and white cell counts.
