They form a discussion on the relevance of statistical inquiry for heritage conservation. Although a building at a larger site has a higher chance to be designated a graded heritage building than one at a smaller site, the chances of it being designated a grade heritage building were statistically higher for an older building than for a newer one; not lower for sites under zoning for non-private uses and lower for a privately owned building than a government building; and above all higher for a site with higher property value.

Public decision making for heritage conservation: A Hong Kong empirical study

Five refutable hypotheses were tested.
