Adult respiratory distress syndrome - an aspect of multiple organ failure : results of a prospective clinical study

Springer-Verlag - Adult Respiratory Distress Syndrome: An Aspect of Multiple Organ Failure Results of a Prospective Clinical Study: 9783540521808: Medicine & Health Science Books @ ne-x.uni.rf.gd

Description: -

-

Respiratory Distress Syndrome, Adult.

Prospective Studies.

Multiple Organ Failure.

Multiple organ failure -- Pathophysiology.

Respiratory distress syndrome, Adult. Adult respiratory distress

syndrome - an aspect of multiple organ failure : results of a

prospective clinical study

-Adult respiratory distress syndrome - an aspect of multiple organ

failure: results of a prospective clinical study

Notes: Includes bibliographical references and index.

This edition was published in 1991

Filesize: 8.45 MB

Adult Respiratory Distress Syndrome: An Aspect of Multiple Organ Failure Results of a Prospective Clinical Study: 9783540521808: Medicine & Health Science Books @ ne-x.uni.rf.gd

The first descriptions of the syndrome generally counted the number of failing systems, using as descriptors, the need for clinical intervention.

Adult respiratory distress syndrome: an aspect of multiple organ failure: results of a prospective clinical study

Brivet F G, Kleinknecht D J, Loirat P, Landais P J M, Bedock B, Bleichner G, Richard C, Coste F, Brun-Buisson C, Sicot C, Tenaillon A, Gajdos P, Blin F, Saulnier F, Agostini M M, Nicolas F, Fery-Lemonnier E, Staikowski F, Carlet J, Guivarch G, Fraisse F, Ricome J, Tempe J D, Mezzarobba P.

Adult Respiratory Distress Syndrome: Sequence and Importance of Development of Multiple Organ Failure

Alternatively, MOD can progress to MOF. A stereotypical pattern of altered hepatic protein synthesis - the acute phase response - typically accompanies MODS as a non-specific manifestation of systemic inflammation. Intolerance of enteral feeding, reflected in bloating and diarrhea is another manifestation of gut dysfunction.

Adult Respiratory Distress Syndrome

The most readily evident, and clinically relevant manifestation of altered immunity in MODS is the development of nosocomial ICU-acquired infection, caused by relatively avirulent organisms. Adrie C, Francais A, Alvarez-Gonzalez A, Mounier R, Azoulay E, Zahar JR, Clec'h C, Goldgran-Toledano D, Hammer L, Descorps-Declere A, Jamali S, Timsit JF; Outcomerea Study Group. Because the syndrome almost invariably

arises following the activation of a host inflammatory response, MODS can be considered to be the maladaptive consequence of acute inflammation, the systemic equivalent of functio laesa, or loss of function, a cardinal sign of acute localized inflammation.

Dying with acute respiratory failure or multiple organ system failure with sepsis

As a syndrome, it is intimately linked to the adaptive host response to injury or infection, and it is to be expected that interventions that can modulate the expression of this response will ultimately prove effective in improving clinical outcome. STURM In modern society, trauma remains the number one cause of death in people under 50 years, but, despite this, very little attention has been paid to trauma care compared with other diseases such as malignancy or myocardial infarction Table 1.
