PPT

Liebig tried to do this by experiments, whereas Helmholtz took a much more general path. Another study measured critical fusion frequency CFF, as a proxy for eye fatigue, on wearers of low and high BB lenses, pre- and post- a two-hour computer task.

In the first edition of Vorlesungen über die Menschenund Thierseele Lectures on human and animal psychology, which was published in 1863, Wundt tried to establish that emotions were essential parts of rational thought.

Introduction to Physiological Optics.

These were the likes of von Helmholtz, Donders, and Gullstrand, who were highly trained in physics and mathematics, and literally wrote the book on visual optics. Each page is checked manually before printing. If the original book was published in multiple volumes then this reprint is of only one volume, not the whole set.
