### The Beginnings of Western Science: The European Scientific Tradition in Philosophical, Religious, and Institutional Context, Prehistory to A.D. 1450

The Renaissance was a period of European transitions, one much more complicated than simply the passing of medieval thought and the beginning of modern thought.

#### The Birth of Modern Science

Aristotle had developed a unique framework with which to understand the world, basically an axiomatix-deductive system of knowledge and a cosmology of the four elements earth, water, air and fire; a distinction between the imperfect sub-lunar and the perfect heavenly spheres; substance as a combination of matter and form; natural places; teleology; prime movers; etc.

### Overview: Physical Sciences 1450

Reading the past for what it is, is of tremendous value, but so is its reading from the perspective of modern knowledge. Perhaps no book other than the Bible can boast so many editions, and certainly no mathematical work has had an influence comparable with that of Euclid's Elements.
