Characterization and purification of TS28, a novel protein localized to the transverse tubules of rabbit skeletal muscle

National Library of Canada - Protein Targeting to the Plasma Membrane of Adult Skeletal Muscle Fiber: An Organized Mosaic of Functional Domains

Description: -

- -Characterization and purification of TS28, a novel protein localized to the transverse tubules of rabbit skeletal muscle
- $\label{Canadian these} Canadian theses = -- Th\`{e}ses canadiennes Characterization and purification of TS28, a novel protein localized to the transverse tubules of rabbit skeletal muscle$

Notes: Thesis (M.Sc.) -- University of Toronto, 1994.

This edition was published in 1994

The Sarcoplasmic Reticulum of Skeletal Muscle: A Look from Inside

Electrophoretic transfer of proteins from polyacrylamide gels to nitrocellulose sheets: procedure and some applications.

Protein Targeting to the Plasma Membrane of Adult Skeletal Muscle Fiber: An Organized Mosaic of Functional Domains

Excluding MCAK, each member of the kinesin superfamily that was examined in this study is expressed in both proliferating and differentiating C2C12 cells, and present in adult muscle.

Organization of junctional sarcoplasmic reticulum proteins in skeletal muscle fibers

Identification of sarcolemma-associated antigens with differential distributions on fast and slow skeletal muscle fibers.

Amphiphysin II (SH3P9; BIN1), a Member of the Amphiphysin/Rvs Family, Is Concentrated in the Cortical Cytomatrix of Axon Initial Segments and Nodes of Ranvier in Brain and around T Tubules in Skeletal Muscle

Microtubule number increases during developmentally significant stages of neonatal cardiac muscle, decreasing upon maturity reviewed in.

Biogenesis of transverse tubules and triads: immunolocalization of the 1,4

The design plan of kinesin motors.
