The Development of Mathematics « Mathematical Science & Technologies

Â Feel free to add your thoughts in the comments! The talk itself was full of personal reflections about the characteristics of these almost legendary figures in modern mathematics and the audience was most appreciative. Jerome Classical School, Hyattsville, MD Johannes Kepler, seventeenth century German physicist best known for his work on planetary motion, said something very similar four hundred years ago: The chief aim of all investigations of the external world should be to discover the rational order and harmony which has been imposed on it by God and which He revealed to us in the language of mathematics. Paideia: the ideals of Greek culture.
