HOL theorem

It seems to me that there are roughly two levels to models of computation: describing what can be computed, and describing how well how quickly, how effectively it can be computed.

Computing with Real Numbers

Two equivalent terms will necessarily have the same output, and therefore the same answer s. Hill A Logical Approach to System Construction.

Séminaire MOVE

Gilleron PAC Learning with Simple Examples.

HOL theorem

Next, we construct from the previous result G',H a subset of vertices that contains the set of vertices that have to be relabeled in order to identify G' with H.

Talks (Archive)

Moreover, it creates a lot more unique molecules than the other two models, many of which are easy to synthesise. The inaugural meeting of ITP was held in July 2010 in Edinburgh, Scotland, as part of the Federated Logic Conference FLoC , and the second meeting took place in Nijmegen, The Netherlands, in August 2011.

Computability over Topological Structures

In this paper we consider the problem of binary classification for multivariate data, which is one of the most fundamental problems in machine learning and pattern recognition. It says that all the hom-categories in some 2-category are terminating and confluent. Pucheral Object Query Services for Telecommunication Networks.

Higher Categories for Concurrency

Papers describing tools that have already been presented in any conference will be accepted only if significant and clear enhancements to the tool are reported and implemented. Giunchiglia Reasoning About Acting, Sensing, and Failure Handling: A Logic for Agents Embedded in the Real World.
