Sample Regression Analysis

The program starts with the minimum number of joinpoints e.

SEER API Documentation

For each cancer site, or schema, valid values, definitions, and registrar notes are provided for clinical TNM and stage group, pathologic TNM and stage group, and relevant Site-Specific Factors SSFs. The panel of CTRs will review the submitted issues and will make any necessary updates to the coding exercises. TNM categories, stage groups, and definitions are based on the Union for International Cancer Control UICC TNM 7th edition classification.

Diagnosis & Procedure Codes

Cancer Treatment involves medical procedures to destroy, modify, control, or remove primary, , or cancer.

Multiple Primary Neoplasms

There are two versions of Joinpoint software available: desktop and command-line. The type of treatment is meant to remove a tumor or minimize the size of tumor or delay the spread of disease.
